Portfolio: taimoor-portfolio-six.vercel.app

SUMMARY

Full-Stack Software Engineer who builds production AI agents, voice agents and business automations, and the code around them in Python and Next.js. Shipped 8 production automations in under 2 months at Kode X Labs, ran the GoHighLevel backend behind client websites for a US company, and built product frontend in a remote team at 8x. Background in computer vision for enterprise retail clients. Focused on reliable systems that remove manual work and show measurable results.

EXPERIENCE

AI Automation Engineer | Kode X Labs — Feb 2026 - Present

Lahore,Pakistan | Full-time

- Built an inbound restaurant **voice AI ordering agent** that confirms the order and price, creates a Stripe payment link via n8n, sends it by SMS and prints the ticket with zero human involvement.
- Cut client onboarding from about 45 minutes of manual setup to zero with a self-serve Stripe signup that auto-provisions a GoHighLevel sub-account and opens a custom launchpad.
- Fixed a critical double-call bug in a Retell AI, n8n, Supabase and SignalWire outbound dialler by adding idempotency checks, eliminating duplicate dials.
- Unified LinkedIn and email outreach in one CRM inbox with a custom GoHighLevel conversation provider for HeyReach and Smartlead, syncing 300+ leads and replies per month, plus a Calendly to CRM sync.
- Built a Next.js operations dashboard with real-time menu availability, call logs and a token-authenticated API, and a Python importer that migrated 5,000+ rows with many-to-many associations.

Software Engineer | 8x — Jan 2026 - Apr 2026

Remote | Contract

- Owned the frontend of a referral platform for brand partnerships (Next.js, TypeScript, Prisma, Tailwind CSS): scout onboarding, referral tracking and a weekly leaderboard, shipped through PR review and CI.
- Worked on the AI support bot for the hiring product so it resolves more candidate questions without a human handoff.

Automation Engineer (GoHighLevel backend) | Systemic Digital — Jun 2025 - Dec 2025

Remote,UnitedStates | Contract

- Cut lead response time from hours to under 2 minutes with automations that capture, deduplicate, tag and route inbound leads.
- Recovered about 12% of cold leads with segmented email and SMS sequences, and lifted review volume about 30% with automated review requests and live review widgets.
- Integrated Google Business Profile and TextGrid phone routing with GoHighLevel, centralising reviews and messages and eliminating missed inbound calls.

Junior Software Developer | AdAxiom Tech — Oct 2023 - Jun 2025

Lahore,Pakistan | Full-time

- PepsiCo Pakistan: trained YOLO models for brand recognition and shelf-quality checks; cut annotation errors 25% with a standard label taxonomy and peer review.
- Aramco Retail: cut manual camera review time 65% with ANPR and PPE compliance analytics that turned detections into operator alerts.
- Built FastAPI inference microservices and connected event triggers to n8n workflows; integrated sensor data for live bottler stock visibility.

Intern, Software and Data | Borjan Pvt. Limited — Jun 2023 - Jul 2023

Lahore, Pakistan

- Python and Flask backend scripts for data processing.

Systemic Digital and 8x were remote contracts held alongside Kode X Labs on non-overlapping schedules.

SKILLS

Languages and frameworks: Python, TypeScript, JavaScript, Next.js, React, FastAPI, Flask, Prisma, Tailwind CSS
AI and LLMs: Claude API, OpenAI API, LangChain, RAG, prompt engineering, YOLO, OpenCV, PyTorch
Voice AI and automation: Retell AI, Vapi, ElevenLabs, SignalWire, Twilio, n8n, Make.com, Zapier, GoHighLevel (workflows, custom objects, conversation providers, Voice AI)
Data and infrastructure: Supabase, PostgreSQL, Airtable, Stripe API, REST APIs and webhooks, Docker, Git, Vercel

EDUCATION

BS Computer Science | National College of Business Administration and Economics, Lahore — 2020 - 2024
